SUMMARY OF TESTING METHODS AND KEY FINDINGS

Our Real World Testing method involved measuring our ability to successfully deliver our clients' AUR reports to NHSN. In calendar year 2022, customers were able to successfully report AUR data to NHSN via the AUR Reporting Module. The total number of successes and NHSN issues resolved were tracked on AUR reports and submitted by BD clients on a monthly basis. By measuring successful report submission, we demonstrated that our clients are able to use our software for AUR reporting and thus improve the speed and accuracy of NHSN reporting.
